Vol 09-33

For the week ending October 18, 2009

WEATHER PARKS COMBINES

Snow and precipitation again halted harvest progress. Only 8 percent of Iowa’s soybean crop and 4 percent of the corn crop was harvested during the last week. Much of that work was done on Sunday when warmer temperatures and dry breezes reached most of the State.

There were 2.0 days suitable for fieldwork during the week, compared to the five-year average of 4.6 days. Topsoil moisture rated 3 percent short, 69 percent adequate, and 28 percent surplus across the state. Subsoil moisture rated 1 percent very short, 6 percent short, 78 percent adequate, and 15 percent surplus.

Field Crops Report: Corn reported mature or safe from frost reached 93 percent, 2 percentage points ahead of last year, but 8 days behind the five-year average. Ten percent of the corn crop has been harvested for grain, 2 percentage points behind last year, and 2 weeks behind the five-year average. Moisture content of all corn in the field is estimated at 27 percent, 6 percentage points higher than the five-year average. Moisture content of corn being harvested is estimated at 23 percent, 5 percentage points higher than the five-year average. Corn lodging is rated 73 percent none, 20 percent light, 6 percent moderate, and 1 percent heavy. Ear droppage is rated 81 percent none, 15 percent light, 3 percent moderate, and 1 percent heavy. Corn condition was rated 2 percent very poor, 5 percent poor, 18 percent fair, 51 percent good, and 24 percent excellent.

Soybeans dropping leaves reached 98 percent, 1 percentage point ahead of last year, but 1 percentage point behind the five-year average. Soybeans harvested reached 37 percent, 41 percentage points behind last year and over 2 weeks behind the five-year average. Soybean lodging is rated 81 percent none, 14 percent light, 4 percent moderate, and 1 percent heavy. Soybeans shattering is rated 77 percent none, 17 percent light, 5 percent moderate, and 1 percent heavy. Soybean condition is rated 2 percent very poor, 5 percent poor, 21 percent fair, 51 percent good, and 21 percent excellent.

Livestock, Pasture and Range Report: Pasture and range condition rated 1 percent very poor, 10 percent poor, 33 percent fair, 44 percent good, and 12 percent excellent. With harvest lagging far behind normal, only a few areas of the State have reported limited to moderate use of stubble fields.

IOWA PRELIMINARY WEATHER SUMMARY Provided by Harry Hillaker, State Climatologist

Iowa endured another unseasonably cold week with frequent light precipitation. Daytime temperatures failed to reach 50 degrees over most of the northern two-thirds of the state until Sunday (18th) when highs ranged from the mid 50’s northeast to the mid 60’s west. Temperature extremes ranged from a Tuesday (13th) morning low of 21 degrees at Mason City to a Sunday (18th) afternoon high of 66 degrees at Sioux City. Temperatures for the week as a whole averaged 10.8 degrees below normal. The reporting week began with light rain and/or snow over the northwestern three-fourths of the state on Monday (12th) with one to two inches of snow common north of a Sioux City to Mason City line. Precipitation moved back into the state late Tuesday with light rain statewide on Wednesday and Thursday. Light snow again fell over parts of northwest and north central Iowa on Tuesday night with a brief accumulation of an inch or two. Light rain persisted over the western one-half of the state on Friday with very welcome dry weather finally returning over the weekend. The weekend dry weather broke a string of 17 consecutive days with measurable precipitation being recorded somewhere in the state. Weekly precipitation totals varied from 0.22 inches at Cedar Rapids to 0.92 inches at Ruthven (Palo Alto County). The statewide average precipitation was 0.46 inches or just a little less than the weekly normal of 0.56 inches. The first 18 days of the month have been the coldest start to October on record in Iowa with temperatures averaged 10.4 degrees below normal.

Statewide Grain Storage Availability as of October 18, 2009			
Item	Short	Adequate	Surplus
	<i>Percent</i>	<i>Percent</i>	<i>Percent</i>
On-farm, grain storage	11	82	7
Off-farm, grain storage	5	86	9
